**6. Remarks and Other Relevant Information:**

The Washington Department of Fish and Wildlife's (WDFW) Big Valley Wildlife Area has recently completed its management plan for the future use of its 845 acres. Several goals and objectives relating to the improvement of the habitat on the Big Valley Ranch including the elimination of significant weed and non-native grass problems on portions of the ranch and the use of their water to establish native grasses and shrubs have been identified that include these and changes to the use of the water associated with the water rights appurtenant to their land therefore we are requesting the addition of a new point of diversion for SWC 1175. This new point of diversion is the same point of diversion of the well as being requested under separate applications for SWC 1176. We are also requesting a change in use for the water right. The agency did not complete its goal of habitat restoration of native grasses on the 17 acres of land within the place of use of the water right and wants to retain ownership of its entire portion of the water right instead of putting the water into the State's Trust Water Rights Program for instream flow at this time. This was requested in a Change Application filed in 2000 and approved in a Report of Examination effective April 15, 2003. Ecology has not issued a superseding certificate for the change in SWC No. 1175@1 as the construction schedule has not been completed.
